

OBJECTIVES

- At the end of this activity, participants will be able:
- Review the ongoing changes in the epidemiology of fungal infection, including risk factors and diagnosis methods
 - To identify strategies for prevention and treatment of fungal infections
 - To identify what is new with influenza, including viral vaccines
 - To identify risk factors associated with postoperative surgical site infections (SSI)
 - To define what are viewed as appropriate practice for antimicrobial prophylaxis in the surgical patient population
 - To describe methods for monitoring antibiotic consumption, including most common pathogens that result from over use of antibiotics
 - To understand the use of rapid molecular testing for various infectious diseases
 - To define and discuss the current trends and treatment of septic shock
 - To discuss the different types of Biotherapy used in infectious diseases

CREDITS
